Clinical Nurse Specialist – Palliative Care

Primary Health Partnership and Allied Health Services

Part-time (56 hours/per fortnight, 0.7FTE)

It takes a very professional, empathetic nurse to be able to manage the care of a terminally ill patient, and right now we are looking for just such a specialist. We need somebody who knows how to navigate the tricky waters of negotiating care plans that are clinically appropriate, as well as acceptable to families.

Naturally, you'll be a Registered Nurse who has a strong clinical background in Palliative Care, and you'll either hold or be working towards a relevant postgraduate (Level 8) qualification.

Whilst planning palliative care means liaising with the families of patients, a major focus will be educating and supporting primary care providers, hospice, residential aged care and secondary care providers.

If you have any questions about the clinical nature of the role, please contact Lee Cordell-Smith, Manager of Health of Older Persons, Long Term Conditions on 03 687 2429 or lcordell-smith@scdhb.health.nz.

Please apply for this vacancy online at <https://scdhb.carecentre.net.nz>

We look forward to receiving your application directly via our Careers Site.

If you have any questions regarding applying for this role please contact Human Resources by phoning 03 687 2230.

Applications will be accepted until 27 January 2017.
