

# Innovation for Transformation

3 & 4 March 2015  
Lecture Theatre, Ko Awatea

## BRIEF OVERVIEW

Creativity and innovation has become an essential skill in the toolkit of leaders of quality improvement. This highly interactive session will provide hands on experience of how to use effective innovation approaches to improve quality, safety, patient experience and cost in order to transform healthcare.

This interactive session will provide a range of tools and methods for creativity and innovation that participants can continue to utilise in their own organisations.

## FACILITATORS

Dr. Lynne Maher, Director of Innovation and Associate Honorary Professor of Nursing The University of Auckland

Paul Plsek, Consultant in Creativity, Innovation and Leadership of Change; Chair of Innovation at the Virginia Mason Health System Seattle; and former Director of the Academy for Large-Scale Change in the UK.

## LEARNING OUTCOMES

Participants will increase their understanding and skills in the following areas:

- Personal understanding of how, as individuals, they can think differently and be effective as leaders for innovation.
- Creating the cultural conditions for innovation.
- Ability to systematically use a process to achieve innovation.
- Successfully integrate creativity methods with improvement methods.
- Knowledge of a range of tools to critically assess the actual problems or challenge that needs solving.
- Creative idea generation and selection of those ideas using tools and methods developed by recognized innovation experts.
- The value of simulation and prototyping ideas to achieve effective tests of change with minimal disruption to clinical areas.
- Preparing for effective implementation.
